Peer-graded Assignment: Module 2 Coding Assignment

Submit by October 9, 11:59 PM PDT

Important Information

It is especially important to submit this assignment before the deadline, October 9, 11:59 PM PDT, because it must be graded by others. If you submit late, there may not be enough classmates around to review your work. This makes it difficult - and in some cases, impossible - to produce a grade. Submit on time to avoid these risks.

Woo-hoo! You get to do some coding! Exciting!

Here is the link to the assignment: http://bit.ly/1SvqVyl

Good luck!

-Yaakov

P.S. If you are falling behind meeting assignment deadlines, don't give up! It's really NOT a problem! Refer to the Grading reading at the beginning of Module 1 to review your options.

Review criteria   **less ⌃**

- Does the implementation use a CSS or Javascript framework (not allowed)?

- Does the implementation use inline CSS (not allowed) or reference a CSS file instead?

- Does the implemented layout conform to the provided mockup illustrations for desktop, tablet, and mobile views?

- Does the section title region always appear in the top right corner of the section region, no matter what view is being displayed (desktop, tablet, or mobile)?

- Is there consistent horizontal spacing between the section regions and browser edges (especially in the desktop and tablet views) and consistent vertical spacing between the regions (especially in the tablet and mobile views)?

- Is there padding separating the dummy text from the edges of the section? Is the dummy text pushed down such that it doesn't overlap the section title region?

- Are the borders and colors implemented according the stated requirements?
